Art Unit:

Claim Rejection under 35 U.S.C. 112, 2nd paragraph

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 22-25,28-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims 22-25,28-33 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: to whom is the suspension delivered.

Claim Rejection under 35 U.S.C. 102(b)

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-5,7,10-14,16,18-20,22-25,28-31,34 are rejected under 35 U.S.C. 102(b) as being anticipated by Gonda et al (US 5743250; 4/28/98). Gonda teaches a method of delivering an aerosol suspension to the lungs. Gonda teaches that the suspension consists of having insulin suspended in ethanol. See abstract, column 8 line 65 - column 9 line 10, column 10 lines 4-15.

The particle size of the insulin in suspension ranges from 0.5 to 13 microns. See column 12 line

Art Unit:

46-48, column 19 lines 29-38, column 41 lines 37-65. Gonda teaches that excipients can be added to the suspension. See column 9 lines 11-13.

Claim Rejection under 35 U.S.C. 103(a)

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15,17,21,33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gonda as applied to claims 1-5,7,10-14,16,18-20,22-25,28-31,34 above. Gonda teaches all that is recited in claims 15,17,21,33 except for the composition / method comprising the instant amounts of insulin and excipients. It would have been obvious to one having ordinary skill in the art to have determined the optimum amounts of insulin and excipients. One would have been motivated to do this in order to develop an aerosol that would have been effective in the treatment of diabetes.
